From HPMG Research Desk...

The Week That Was

September 29th to October 3rd 2025.

Well, investors have reason to cheer as Nifty ended the week with a decisive gain, signalling that bullish momentum could steadily become the new normal at Dalal Street.

Our **call of the week** highlights that the phase of turbulence and uncertainty appears to be fading. The optimism is underpinned by strengthening rate-cut bets, driven by policy signals

- 1. The Reserve Bank of India (RBI)
- 2. The U.S. Federal Reserve (Fed)

Long Story Short: The upcoming third quarter qualifies as a period of bullish normalcy. That should definitely delight and make investors happy!

Nifty (+0.97%, 24894) Sensex (+0.97%, 81207) Bank Nifty (+2.21%, 55589)

The Good News: Bank Nifty has begun to outperform, signaling that substantial rate cuts are on the horizon.

Amidst this bullish backdrop, Nifty bulls are now setting sights on the 25,000 milestone, with the next target goal post firmly placed at its all-time high of 26,277.35.

Key Snippets & Highlights:

- 1) The Reserve Bank of India's Monetary Policy Committee (MPC) decided to keep the benchmark reporate unchanged at 5.5% on October 1, second time in a row.
- 2) The MPC also kept the stance unchanged to 'Neutral'.

As a result, the standing deposit facility (SDF) rate remains unchanged at 5.25 per cent and the marginal standing facility (MSF) rate and the Bank Rate at 5.75 per cent.

- 3) **Inflation forecast:** The average headline inflation of this year has been revised downward from 3.1% to 2.6%.
- 4) The RBI governor also observed that the recent GST cuts will also help in reducing prices.
- 5) The big surprise came on the GDP growth front with the RBI MPC revising it up to 6.8% from its earlier projection of 6.5%.

However, the governor noted that prolonged geopolitical tension and volatility in international financial markets pose downside risks to the growth.

6) The RBI Governor, Sanjay Malhotra, also said the forex reserves are sufficient to cover more than 11-months of outflows. The overall external sector continues to be resilient, and we remain confident of meeting our external obligations comfortably.

The Week Ahead: Will Nifty reclaim psychological 25000 mark this week?

It's encouraging to see Nifty bulls charging into October with strength, especially after a bruising losing streak not seen since March.

The rebound is actually powered by renewed optimism from the RBI, which not only expressed confidence in India's economic resilience but also stepped in with liquidity support measures.

Well, with sentiment turning bullish, the stage is set for bulls to extend their run, as helping sentiments are supportive global cues.

Wall Street at new record highs: The Dow, S&P 500, and Nasdaq are flirting with their record peaks.

Amongst big headwinds, uncertainty looms as the US government shutdown continues to be on the front pages. The official U.S. Nonfarm Payrolls data too was delayed.

Persistent foreign portfolio investor outflows is the next headwind.

Last week, the FIIs have net sold to the tune of Rs. 8347.30 Cr. This FY26, FIIs selling has already sold to the tune of Rs. 112649 Cr.

PP: Pivot Point : This is trigger point for weekly buy/sell based on the price range of the previous week.
R1: Resistance one : 1st Resistance over PP. R2 : Resistance two : 2nd Resistance over R1.
S1: Support one : 1st support after PP. S2 : Support Two : 2nd support after S1.

As per the tool, the trader should take BUY position just above PP and keep the stop loss of PP and the first target would be R1. If R1 is crossed then R2 becomes the next target with the stop loss at R1. Similarly if price goes below PP the trader should SELL and keep the PP as Stop loss and the first target would be S1. If S1 is crossed then S2 becomes the next target with the stop loss at S1. This is a trading tool. The key to use of this tool is the use of STOP LOSS.
